BEFORE YOU BEGIN

Welcome, colorist

Inside are pages that look like nothing more than tidy grids of numbers. Give each number its color and something unexpected takes shape — slowly at first, then all at once.

3
hidden pictures

11
colors at most per page

0
drawing skills needed

- There is no rush and no wrong order. Pick any page that catches your eye.
- Every page stands on its own, with its own color key.
- Curious how a picture turns out? The finished versions are waiting at the back of the book.

COLOR BY NUMBER

How it works

01

Check the key

Each page has its own key. Every code stands for one color — try that color in the empty circle beside it so you know which pen to reach for.

02

Pick one color

Choose a code and hunt for every numbered cell that shows it. Working one color at a time is the quickest way through a page.

03

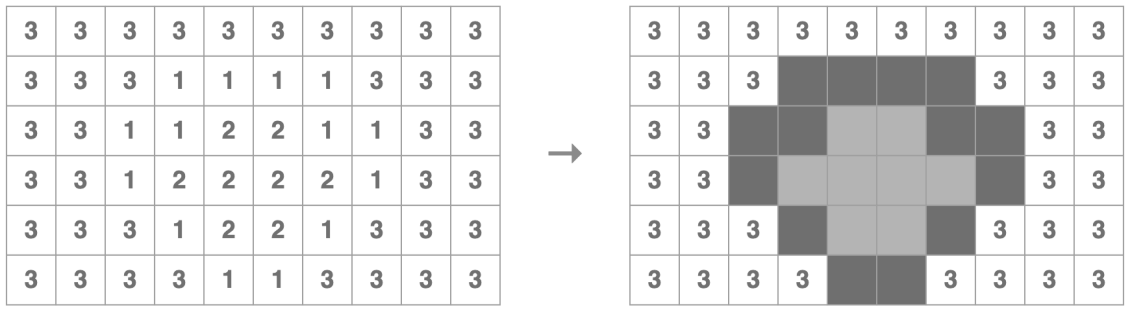

Color it in

Fill each cell that carries the code. Small slips vanish once the picture is complete, so don’t worry about perfect edges.

04

Watch it appear

Shapes start to show after a few colors. Compare with the finished pictures at the back of the book whenever you like.

Before

After

SWATCH SHEET

Test your colors

Color a square for every pen or pencil you plan to use and write its name underneath. It is the easiest way to spot two shades that look too alike before they meet on a page.

Thank you

for spending your time with 3 Color by Number

Every picture in these pages waited quietly until someone gave it color. We hope revealing them brought you a few calm evenings and a smile or two, whether you finished one page or every one of them.

If the book made your day a little brighter, a short review where you bought it would mean a great deal. It helps other colorists find their way here — and it helps a small publisher keep making books like this one.

See you on the next page.
